Institute for Systems Biology (ISB) Non-Profit Software License

PREAMBLE

This License is for Covered Software that creates digital "fingerprints" that preserves distances between the source data without preserving other identifiable features.

The Covered Software is offered under this License at no cost to Non-Profit Organizations (hereinafter "**NPOs**") for their internal use and modification. NPOs may also distribute the Covered Software, including Modifications, to other NPOs under this License and may make publicly available libraries of fingerprints, whether created using the Original Software or Modifications. In order to insure the ability to compare fingerprints in different libraries, any organization modifying the Original Software or Covered Software must provide a copy of the Modifications to ISB, who may then use, sublicense, copy or modify those Modifications.

This License does not permit the distribution of the Covered Software to for-profit organizations or the performing of services for for-profit organizations using the Covered Software. Please contact ISB for licenses of the Covered Software to or for the benefit of for-profit organizations.

This License states the complete agreement between ISB and User for the Covered Software and User agrees to carefully read this License before downloading, installing, accessing or using the Covered Software. By downloading, installing, accessing or using the Covered Software, you are agreeing to the terms of this License. If you are not willing to be bound by this License, then you must not download, install, access, or use the Covered Software.
